MANNE ARAVIND

Ph no: 9701851942 | **Email:** mannearavind07@gmail.com | **LinkedIn:** mannearavind

SUMMARY

Software Developer with a strong foundation in Python, JavaScript, React.js, and web development. Experienced in building responsive web applications, developing reusable components, integrating REST APIs, and working with relational and NoSQL databases. Strong problem-solving skills with an understanding of Data Structures and Algorithms and Object-Oriented Programming. Passionate about writing clean, maintainable code and developing efficient software solutions.

SKILLS

Programming: Python, JavaScript
Database: SQL, NoSQL (MongoDB)
Web Development: Html5, CSS, ReactJS
Backend Development: Node.js, Express.js
Core Computer Science: Data Structures and Algorithms (DSA), OOP Concepts, Problem Solving
AI Tools: ChatGPT, Claude, Gemini, Google Flow, Google AI Studio

EXPERIENCE

AI Prompt Engineer Intern – **Easy2Learn Pvt Ltd** **Hyderabad, Telangana** **Jan 2026 - Apr2026**

Skills: AI Prompt Engineering, ChatGPT, Google AI Studio, Google Flow, Generative AI, Image & Video Generation

- Designed and optimized prompt engineering workflows for generative AI tools to create high-quality educational images, videos, audio, and animated content.
- Leveraged AI platforms including ChatGPT, Google Flow, Speechma, and Google AI Studio to develop AI-driven educational media tailored for different learner proficiency levels, improving engagement and content quality.

PROJECTS

CineQuest - Movie Discovery Platform **Link**

Skills: React.js, JavaScript, HTML, CSS

- Developed a responsive movie discovery application featuring Popular, Top rated, upcoming, movie details, global search, and pagination using React.js and TMDB REST APIs.
- Developed reusable React components, implemented client-side routing and REST API integration, managed environment variables

Face mask detection- Using Machine Learning

Skills: Python, OpenCV, Machine Learning, CNN

- Developed a machine learning model to recognize face with and without a mask which is pre-trained on CNNs with Viola-Jones algorithm on Haar-cascade dataset with opencv python library.
- We have used SVC to process large amounts of data and improving the accuracy for prediction.

Bone Fracture Classification in X-Ray Using Deep Learning Models

Skills: Python, Flask, SQL, Machine Learning, Deep Learning, Medical Image Analysis, Tensorflow, CNN, YOLO, OpenCV

- Built an end-to-end bone fracture detection and classification system using a hybrid Xception + ResNet50 ensemble with ML classifiers (Random Forest, SVM, XGBoost), achieving 97.3% accuracy.
- Developed a Flask-based web application with YOLOv8-powered real-time fracture localization (0.858 mAP) and Grad-CAM visualizations for interpretable clinician-friendly X-ray analysis.

CERTIFICATIONS

- Oracle Cloud Infrastructure 2025 Certified Data Science Professional.
- Oracle Cloud Infrastructure 2025 Certified Generative AI Professional.
- Oracle Cloud Infrastructure 2025 Certified AI Foundations Associate.
- Data Analytics-Deloitte
- Programming in Java- NPTEL
- Deep Learning - NPTEL

EDUCATION

Bachelor of Technology (B. Tech)	CSE-AIML	Malla Reddy University
CGPA: 9.0/10.0	Aug 2022 – May 2026	
Intermediate	MPC	Sri Chaitanya College
Percentage: 91.4	Jun 2020 – May 2022
